

J-Frame Blind Nut Auto Feed

J-Frame Blind Nut Auto Feed Into Flanged Part

Description of Application:

Blind nuts being inserted into flanged part.

Customer Requirement:

The ability to auto feed blind nuts automatically into a shallow formed flanged part.

Haeger Solution:

Haeger's Custom Tooling department designed & manufactured a special J-frame automatic tooling set that provides the customer access to every blind nut under the flange of the their part.

Customer Benefit:

The customer was able to quickly insert all the blind nuts into their part automatically with only one part handling.
