

ps:multitool-3

MT3Ri3-31,75 for machine type FINN-POWER

- simple and quick change of the inserts with max. process security
- low tool and guide abrasion due to max. guide length
- no „witness-marks“ on the sheet due to single acting punches. All unused punch inserts remain „up“ in the tool
- oil channels for interior and outside grinding
- individual adaptation of the stripper spring force
- max. work area due to solid version of each single components for sheet thickness up to $s = 6 \text{ mm}$
- control-spring used for determining the useable grind life of the sharpened punch inserts („finger feel adjustment“)
- no „witness-marks“ on the sheet due to single acting punches. All unused punch inserts remain „up“ in the tool
